Dr Mr. Levitt,

I am a mother of a 10 year old daughter who has Celiac Disease. If you are unfamiliar with it it is a Gluten Intolerance that without strict adherence to a gluten free diet will cause damage to the intestines and other internal and external ailments. I also have Celiac disease. I am writing you this note to encourage you and the FDA to make product labeling more precise. So that we may know what hidden dangers are in our food. This is extremely important to a large population of people not only with Celiac disease but many other ailments.

Please Thank you for your time.
